RESILIENT NORFOLK COASTAL STORM RISK MANAGEMENT PROJECT:
Notice of Utility and Geotechnical Investigations

CITY OF NORFOLK | OFFICE OF RESILIENCE

PHASE 1C EAST PROJECT AREA

The City of Norfolk’s Office of Resilience and the U.S. Army Corps of Engineers have partnered to implement the Resilient Norfolk Coastal Storm Risk Management Project (Resilient Norfolk) to reduce the City’s risk from coastal flooding and damage from nor’easters, hurricanes, and other significant storm events. For information on the Resilient Norfolk project, visit www.resilientnorfolk.com.

The City of Norfolk has contracted with Norfolk Resilience Partners (NRP) to perform utility and geotechnical investigations between February and May 2024. NRP will drill test bores, perform geotechnical (soil) sampling, site and environmental surveying, and compile a tree inventory within the neighborhood to advance engineering and design for this phase of the Resilient Norfolk project.

The colored area on the map shows the general area of the investigations to be completed. Timing of the work will vary based on contractor progress and weather. These investigations are critical to assist the City in developing a design and timeline for this phase of the project as construction is tentatively planned from summer 2027 to fall 2031.

Every effort is being made to minimize impacts to property owners and the environment.

Starts: February 2024 **Ends:** May 2024

Work Hours: 8:00 a.m.-5:00 p.m.;
Monday - Friday (excluding events and holidays)

Access: Access to businesses and residences will be maintained throughout the activities. The City and its contractors will make every effort to minimize disruptions associated with exploratory activities. Contractors may be working close to your property line in the existing right-of-way (street) to identify property boundaries, easements, and surface features. Contractors will NOT need to access your building.

Traffic: There may be temporary restricted road or sidewalk access. Contractors will implement safe traffic control measures.

Site Restoration: All drillings will be restored to previous or better conditions in accordance with City standards.

Questions/Concerns:
Call: 757-401-4042 | Email: norfolkrc@norfolk.gov
